## Introduction

More than one thousand Tardigrada species were included in the recently published checklist (Guidetti, R. & Bertolani, R. 2005. **Tardigrade taxonomy: an updated check list of the taxa and a list of characters for their identification.** *Zootaxa*, 845, 1–46.) plus the additions and corrections to this checklist (Degma, P. & Guidetti, R. 2007. **Notes to the current checklist of Tardigrada.** *Zootaxa*, 1579, 41–53.). For practical reasons, we have joined these two papers (without comments added to particular taxa as well as without references published in these papers) into an accurate combined version of the checklists. This checklist is free for all users, but utilization of it requires the citation of the two original papers. This paper is the platform for occasional upgrades (date of latest upgrade is in the title). All changes, additions and corrections in comparison with both papers are written in red font. If you also use these changes, please also cite this checklist (Degma, P., Bertolani, R. & Guidetti, R. 2009-2011. **Actual checklist of Tardigrada species. Ver. 19: 31-05-2011.** <http://www.tardigrada.modena.unimo.it/miscellanea/Actual%20checklist%20of%20Tardigrada.pdf>, pp. 36). Please write us if you find any mistake or missing data in this checklist. Your help in its improvement will be acknowledged.

## Acknowledgements

We are very grateful to Professor Clark Beasley (McMurry University, Abilene, U.S.A.) for his suggestions as well as for help with improving the English in the last version of the manuscript. We also thank to Nigel Marley (University of Plymouth, U.K.), Gary Grothman (St. Mary's University, Calgary, Canada) and Paulo Fontoura (University of Porto, Portugal) for their valuable comments to this checklist.

This study was partly supported by the Slovak Scientific Grant Agency (VEGA) (grant No. 1/3265/06 and 1/0294/09 to PD), by University of Modena and Reggio Emilia (50% FAR) and by Fondazione Cassa di Risparmio di Modena (MoDNA project: Morphology and DNA) to RB and RG.

(The assignment of synonyms are reported within square parenthesis '[ ]'. Amendments are reported within angle brackets '< >'. Comments are reported within brace parenthesis '{ }'.

The species written in bold characters are the genus *type species*)
